1T52044 | HSS drill bit with pilot and ejector ESSENTIAL (Hanging tube)

For use on low-thickness steel, sheet metal, stainless steel, aluminium, PVC, IPN etc. For all mechanical tasks and tasks relating to car bodywork, electrical work, plumbing.

- High-speed steel
- Ejector spring

Machine

Application

Stainless steel sheet | Sheet metal | Metal | Plastic

Features

Properties and benefits

- High-speed steel: HSS substrate ➔ For general use in steels and cast irons up to 950 N/mm²
- Ejector spring: for quick and continuous work ➔ Enables the rapid removal of the core in thin sheet metals.
