

**1090543 | Maxter4 concrete drill bit - SDS MAX - L320 mm
TECHNIC (Hanging SDS clip)**

High-performance drill bit for the deep and large diameter drilling of reinforced concrete and harder materials. Fast and long-lasting drilling thanks to its multi-edge cutting inserts

- Especially for reinforced concrete and hard materials
- Deep and through-drilling
- Maximum long life
- Rapid drilling
- Precise drilling

- SDSmax shank
- High-strength steel
- Dust extraction +++
- Pad with 2 cutting edges

Machine

Application

Concrete

Reinforced concrete

Features

Properties and benefits

- + SDSmax shank: attachment for SDSmax hammer drills (18 mm shank diameter) compliant with the SDSmax label, greater than 3 joules. ➡ Maximum striking power transmission for the simple and fast processing of the most difficult materials. For bits larger than 12 mm.
- + High strength steel body: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➡ Enables optimal power and torque transmission to the head of the tool.
- + Effective dust clearance: body of the tool designed with a large-capacity fluted profile, for the easy extraction of materials. ➡ For optimal and regular evacuation of dust.
- + Cutting insert with 4 cutting edges: carbide cutting insert designed with four cutting edges, distributed force, anti-jamming effect. ➡ Enables the drilling of hard materials and reinforcing rods, thanks to its 4 cutting edges.
