

Drill bit crown made of tempered steel with asymmetrical carbide teeth. Aggressive drilling of hard materials.

- SDSmax shank
- High-temp. soldering

Machine

Application

Concrete Stone

Features

Properties and benefits

- + SDSmax shank: attachment for SDSmax hammer drills (18 mm shank diameter) compliant with the SDSmax label, greater than 3 joules. ➡ Maximum striking power transmission for the simple and fast processing of the most difficult materials. For bits larger than 12 mm.
- + High-temperature soldering: the carbide teeth are welded at a high temperature for better adherence to the crown. ➡ The procedure for the fixing of the pads increases the service life of the tool.
