Features

Properties and benefits

- + Split-point grinding:reduction of the drill tip.

 Enables the simple self-centring of the drill bit on the smoothest of surfaces. Significantly reduces the requried axial load.
- + 6.35 mm hexagonal shank / DIN 3126 C 6.3 standard: geometric characteristics comply with dimensional standards.

 Enables a perfect hold with bit-holders.
- → 30° type N flute: normal flute profile with a 30° helix angle.
 → Suitable for general use. Provides good rigidity to the tool, as well as excellent drilling precision.
- → High-speed steel: HSS substrate OFor general use in steels and cast irons up to 950 N/mm²
- 118° tip: 118° tip angle for the sharpening of the drill bit. Suitable for general use in materials with long shavings. Enables the rapid attach of the material and simple centring.
