

Drilling of steels and cast irons. Comfort, precision.

- Especially for high-strength steels and cast irons
- Rapid drilling
- Tough
- Versatile use
  
- Automatic centring
- Cylindrical shank
- 30° type N flute
- High-speed steel
- 118° tip

#### Machine

#### Application

K2- Gray  
Cast iron

K3-  
Nodular  
and GS  
Cast iron

P1-  
Unrealized  
steels

P2-  
Weakly  
allied  
steels

#### Features

#### Properties and benefits

- + Split-point grinding:reduction of the drill tip. ➡ Enables the simple self-centring of the drill bit on the smoothest of surfaces. Significantly reduces the required axial load.
- + Cylindrical shank: the diameter of the shank is equal to the diameter of the tip. ➡ Enables versatile use on portable electrical tools and CNC machine tools.
- + 30° type N flute: normal flute profile with a 30° helix angle. ➡ Suitable for general use. Provides good rigidity to the tool, as well as excellent drilling precision.
- + High-speed steel: HSS substrate ➡ For general use in steels and cast irons up to 950 N/mm<sup>2</sup>
- + 118° tip: 118° tip angle for the sharpening of the drill bit. ➡ Suitable for general use in materials with long shavings. Enables the rapid attach of the material and simple centring.
