

11457370002 | 5 Fully ground HSS cobalt metal drill bits - Hexagonal shank - DIN338 - h8 - Tivoly Smart Point Sharpening (Case)

High performance drill bit for shock series drilling of stainless and resistant steels thanks to stepped sharpening, cobalt substrate, hexagonal shank. Allows enlargement and clean holes.

- Progressive drilling at entry and exit
- Burr-free drilling
- Allows the enlargement of existing holes
- No slipping on curved surfaces
- Minimum vibrations

- Automatic centring
- Quick-change shank
- 5% cobalt HSS
- For impact machines

Ø 3 - 4 - 5 - 6 - 8 mm - CLIPSTER case

Machine

Application

Features

Properties and benefits

- + Split-point grinding:reduction of the drill tip. ➡ Enables the simple self-centring of the drill bit on the smoothest of surfaces. Significantly reduces the required axial load.
- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard ➡ Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + 5% cobalt high-speed steel: HSS substrate enriched with 5% cobalt. Improved heat retention (strength, cutting sharpness) ➡ For general use in metals up to 1200 N/mm².
- + Shock Series Impact: geometry and material specifically designed for use on high-power impact machines. ➡ Resistant to high tightening torques and can handle all seized screws and bolts.
