Features

Properties and benefits

- ♣
 Split-point grinding:reduction of the drill tip.
 ♦
 Enables the simple self-centring of the drill bit on the smoothest of surfaces. Significantly
 reduces the requried axial load.
- 35° type N flute: normal flute profile with a 35° helix angle. Suitable for strong and difficult materials. Enables finer edge sharpness, for reduced cutting effort.
- 🕂 5% cobalt high-speed steel: HSS substrate enriched with 5% cobalt. Improved heat retention (strength, cutting sharpness) 🤤 For general use in metals up to 1200 N/mm².
- 135° tip: 135° tip angle for the sharpening of the drill bit. 🕏 Suitable for strong and difficult materials. Enables a shorter and stronger cutting edge, thus prolonging the service life.
- SLR laser graduation: laser graduation on the cutting part of the drill bit. 2 Laser graduation allows you to control your drilling depth while the bit is rotating.
