Features

Properties and benefits

- → Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard Cenables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- 🕂 With different color rings depending on the screw heads 🤤 For the simple and fast recognition of screw head types. Each screw head has its own colour code
- TiN coating: surface treated with titanium nitride, for resistance to wear. © Enables greater longevity of the screwdriver bit and protection against corrosion.
- Break-resistant twist: reduced central geometry and special thermal treatment that absorbs peak screwing forces and extreme torque variations. Prevents the premature breakage of the bit, as well as its premature wear, for a longer service life.
