

## 1190062 | 90° drill & countersink bit for wood - Hexagonal shank **TECHNIC (Blister)**

Drill and countersink bit enabling the drilling and milling of wood in a single operation. 6.35 Quick-Change hexagonal shank

- Especially for hard and soft woods
- Combined drilling and milling
- Quick tool changing
- Carbon steel
- Quick-change shank
- Large chip clearance
- Centring point
- For impact machines

### Machine

### Application

### Features

### Properties and benefits

- + Carbon steel: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➡ Enables the fast and precise cutting of the tools into soft and hard woods. Superior service life.
- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard ➡ Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + Effective removal of chips: flutes wit effective removal, for the optimal removal of chips. ➡ Enables fast drilling on account of the simple removal of chips.
- + Centring point: cut designed with a central centring point ➡ Enables the simple centring of the drill for precision work.
- + Shock Series Impact: geometry and material specifically designed for use on high-power impact screwdrivers. ➡ Can withstand high torques, for an improved service life.
