

## 1200042 | Glass drill bit with 4 cutters - TiN coated - Hexagonal shank **TECHNIC** (Blister)

High-performance drill bit for the rotation drilling of glass, thanks to its quadruple carbide cutting insert and its TITANIUM coating. 6.35 Quick-Change hexagonal shank

- Especially for glass
- Precise drilling
- Quick tool changing
- 4 cutting edges
- Quick-change shank
- TiN coating

### Machine

### Application

Earthenware /Glass tiles

### Features

### Properties and benefits

- + The 4 carbide cutting edges enable the improved distribution of forces, and facilitate gradual and safe work. ➡ The 4 carbide cutting edges enable the improved distribution of forces, and facilitate gradual and safe work.
- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard ➡ Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + TiN coating: TiN base, thickness 2/4µm, hardness 2300HV, coefficient of friction 0.4, heat resistance 600°C. Protects against abrasion, oxidation, adhesion. ➡ Thermal shield. Allows you to increase service life, cutting speed, and progress. Reduces the axial load. General use.
