1200112 | Glass drill bit - HQ carbide cutting insert - Reinforced cylindrical shank TECHNIC (Blister)

High-performance tip for the rotation drilling of glass and earthenware, thanks to its special carbide cutting insert and its reinforced body.

- **Especially for glass and hard coatings**
- **Ultra-precise drilling**
- **Maximum long life**
- **Rapid drilling**
- **Made in France**

- Quick-change shank
- High strength
- Carbide cutting insert

Machine

Application

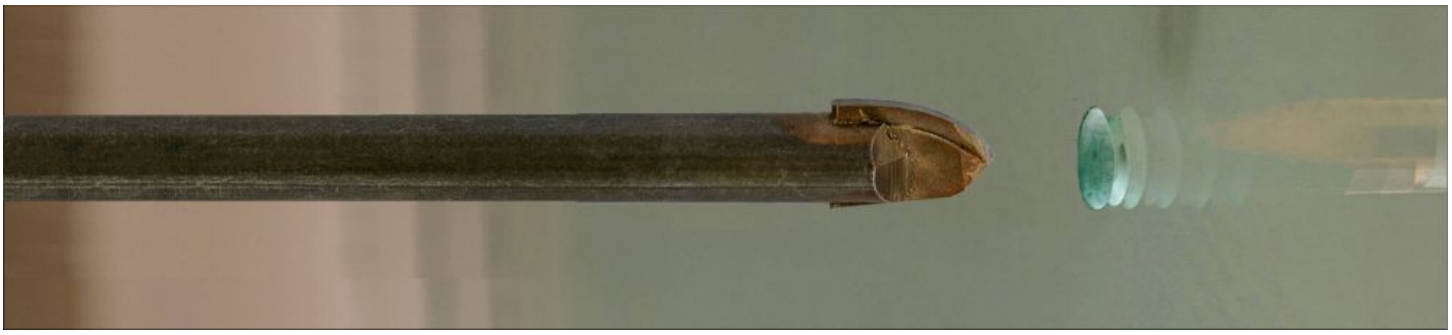

Ceramics Glass

Features

Properties and benefits

- Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard ➔ Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- High strength steel body: body designed in a grade of steel designed for thermal processing, enabling excellent power and torque transmission. ➔ Enables the reduction of vibrations and ensure safety during intensive drilling.
- Special carbide cutting insert: "Oversize" carbide cutting insert designed for the intensive and safe cutting of glass and earthenware. ➔ Oversize multifaceted carbide cutting insert. High precision and maximum lifespan.
