

1T50262 | Jigsaw blade - For aluminium - T attachment TECHNIC (Blister)

High-speed steel, tempered in a vacuum furnace, is used for working the hardest of materials, such as metal (iron and steel), aluminium, and non-ferrous metals.

- Milled, set
- HSS steel

Machine

Application

Aluminum

Features

Properties and benefits

- + Milled, set: blade for somewhat crude cutting into hard and soft wood, aluminium, plastic materials, and non-ferrous metals. ➔ Enables the rapid progression of the blade into hard and soft wood, aluminium, plastic materials, and non-ferrous metals.
- + HSS steel: High-quality, fully hardened steel. Ideal for machining ferrous and non-ferrous metals, cast irons, and aluminiums. ➔ Enables a longer service life.
