

1T50472 | Jigsaw blade - For stainless steel - U attachment **TECHNIC** (Blister)

High-speed steel, tempered in a vacuum furnace, is used for working the hardest of materials, such as metal (iron and steel), aluminium, and non-ferrous metals.

- Milled, set
- HSS toothing

Machine

Application

Stainless steel sheet

Pipe

Stainless steel tube

Features

Properties and benefits

- + Milled, set: blade for somewhat crude cutting into hard and soft wood, aluminium, plastic materials, and non-ferrous metals. ⚙️ Enables the rapid progression of the blade into hard and soft wood, aluminium, plastic materials, and non-ferrous metals.
- + Bi-metal steel blade: combination of progressive toothing made from quick-cutting tempered steel (HSS), and the body made from high-strength carbon steel (HCS). ⚙️ Very flexible, used when there is a risk that the attachment will break. Very high resistance to wear, for a longer service life.
