

High performance milling cutter for grooving thin webs. ALCUT coating reduces the coefficient of friction and improves chip evacuation. Made in France.

- Especially for aluminium
- Effective Chips removal
- High speed machining
- Maximum long life
- Made in France

- Monobloc carbide + PVD

Machine

Application

N1-
Aluminum
alloy

Features

Properties and benefits

- + Monobloc carbide + PVD : Tool body made of solid tungsten carbide (HM) with a PVD coating. ➡ Allows for better chip evacuation. Extends tool life and optimises cutting conditions.
