

120° drill for pointing, centring. Allows centring and chamfering in one operation with a larger diameter than the drilling tool.

- **Made in France**
- **Monobloc tool**

- **4-sided grinding**
- **Cylindrical shank**
- **Monobloc carbide**

Machine

Application

Features

Properties and benefits

- + 4-sided grinding: directly derived from the grinding of monobloc carbide drill bits. Flat cutting and undercutting sides with a constant clearance angle. ⚙️ Very high stability and excellent precision Particularly well-suited for difficult drilling applications (stainless steel...)
- + Cylindrical shank: the diameter of the shank is equal to the diameter of the tip. ⚙️ Enables versatile use on portable electrical tools and CNC machine tools.
- + Monobloc carbide (Milling) : Tungsten carbide. ⚙️ Micrograin carbide for stable cutting edges and better wear resistance.
