

XT51092 | Reciprocating saw blade - For pruning - Universal attachment ESSENTIAL (Carton sleeve)

High-alloy vanadium chrome steel is used for working on softer materials such as wood, fiberboard panels, and synthetic materials.

- Milled, wavy set
- Carbon steel toothing

Machine

Features

HCS

Properties and benefits

- + Milled, wavy set: the milled wavy toothing maintains a contact surface between the blade and the material. ➡ Prevents jolts and enables very clean cuts into plywood, aluminium, non-ferrous metals and plastic materials.
- + Blade made from HCS carbon steel: high-strength carbon steel ideal for cutting into soft wood and non-abrasive carpentry materials. ➡ Enables longer service life thanks to the flexibility of the blade.
