

HM carbide grain-coated tool for the drilling of abrasive materials. Ideal for laying pipes, ventilation.

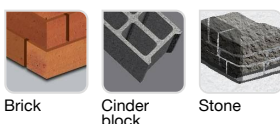

- Carbide grain deposits
- Multi-blade
- All-in-one

**Machine**

**Application**

**Features**

**Properties and benefits**

- + Carbide grain: carbide aggregate that surrounds the blade. ➡ Enables the rapid cutting of abrasive materials, such as brick, cinder blocks, roof tiles, and slates.
- + Multi-blade: several diameters of hole saws available. ➡ Hole saws enable the better coverage of your drilling requirements, thanks to their multiple blades covering several different diameters.
- + All-in-one: a complete tool including the base, m blade, and guide bit. ➡ A complete, ready-to-use tool.
