

Crown equipped with HM carbide teeth for aggressive drilling into resistant materials.

- Shank adapts to SDS+
- High-temp. soldering

Machine

Application

Concrete Stone

Features

Properties and benefits

- + SDS shank: attachment for SDS+ hammer drills (10 mm shank diameter) → Maximum striking power transmission for the simple and fast drilling of the most difficult materials.
- + High-temperature soldering: the carbide teeth are welded at a high temperature for better adherence to the crown. → The procedure for the fixing of the pads increases the service life of the tool.
