

Cutter with 2 industrial quality micro-grain carbide cutting edges. Tool made from special abrasion-resistant steel. Made for demanding jobs.

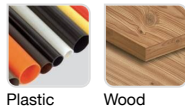

- For fluting
- Diamond cut HM blades
- Ø8 mm shank

Machine

Application

Features

Properties and benefits

- + For fluting: cutter with a hemispheric end. ➡ Allows you to create a rounded groove
- + Diamond cut HM blades: cut micro-grain tungsten carbide blade for a diamond grinding wheel. ➡ Enables simple and precise work on hard or soft woods, melamine-coated woods, laminated woods, and plastics. Offers a clean cut, and comfortable cutting.
- + Ø8 mm attachment: rectified cylindrical shank with an 8 mm diameter, standard, without flats. ➡ Suitable for routers with an 8 mm bit-holder.
